Profile Summary

Full Stack Architect / NodeJS Lead having total 10+ years of experience in IT Industry and managing a cross-functional team of engineers, ensuring high performance and collaboration. Building REST based APIs for web and app-based products. Have experience working with databases MySQL, Postgres, and MongoDB. Predominantly worked on AWS technologies where I have focused on serverless and microservices pattern of development.

- Mentored and coached junior and senior engineers, fostering professional growth and skill development.
- Led regular one-on-ones and performance reviews to provide constructive feedback and career guidance.
- Collaborated with product managers and stakeholders to define project scope, timelines, and technical requirements.
- Worked on Microservices Architecture using AWS Services (Lambda, API Gateway)
- Deployment of applications on AWS EBS
- GIT, SVN Expert
- GraphQL Experience

Certifications

- AWS Certified Cloud Practitioner
- AWS Certified Solutions Architect - Associate

Skill Set

Programming Languages

- NodeJS, JavaScript, Typescript, ReactJS, Python

Frameworks & Libraries

- ExpressJS, HapiJS, NestJS, React, Angular, FastAPI
- HTML, CSS, Bootstrap, Material UI
- Databricks
- Databases – MySQL, Postgres, MongoDB, DynamoDB

Technologies & Cloud

- AWS – S3, EC2, ECS, EKS, API Gateway, Lambdas , IAM , CloudFront, SQS, SNS, SAM, Serverless Deployments
- GCP – Google Cloud Functions, Postgres, Firebase CLI
- Azure – Azure CLI, Azure Pipelines
- CRM Integrations – SFDC, Lithium, Marketo, Telium, Braze
- Devops – Bamboo CI/CD Pipelines, Gitlab Pipelines, Jenkins Pipelines, AWS CodePipeline

Version Control

- Git, SVN

Professional Experience

Duration: 2023 Oct – Present
Company: Credera | Hyderabad, India
Client: Amgen
Role: Off-shore Tech Lead

Project # : SENSING PRODUCT

Roles and Responsibilities

- Lead a team of 12 full stack engineers from India team perspective on tech stack which includes NodeJS,AWS,ReactJS,Python, Databricks
- Participation in Sprint ceremonies i.e. Standup Call, Retros and Sprint Plannings
- Contributed towards the development of new feature and optimization of existing features
- Part of Architecture discussions with Amgen core team
- Internal discussion on new stories assigned and delivering the stories on time

TECH STACK: NodeJS | GraphQL | Python | FastAPI | Postgres | Redis | AWS EKS | React | Databricks | Spark |

TOOLS: VS Code | Databricks | Dbeaver | PyCharm

Duration: 2023 Feb – 2023 Sept
Company: Credera | Hyderabad, India
Client: Signature Graphics
Role: Tech Lead

Project # : ECOMM

PORTAL Roles and

Responsibilities

- Lead a team of 4 full stack engineers on tech stack which includes ReactJS,NodeJS and AWS
- Daily sync with business stakeholders to under the requirements, creation

of architecture, scoping the work and delivering the work

- Automated the entire deployment process using AWS for both UI and backend Serverless API

TECH STACK: NodeJS | ReactJS | AWS Lambdas | API Gateway | CRP Integrations | AWS Cloudfront | AWS Step Functions | DynamoDB

TOOLS: VS Code | DBeaver | NVM

Duration: 2022 Oct – 2023 Jan
Company: Credera | Hyderabad, India
Client: Areteans
Role: Tech Lead

Project # : Marketing Analytics Platform (MAP)

Roles and Responsibilities

- Build up the entire architecture for MAP using AWS Services
- Lead a team of 2 full stack engineers, finalizing the scope of the project
- Creation of stories using planning pocker and assigning them to individual resources

TECH STACK: AWS Lambda | API Gateway | NodeJS | Python | AWS Glue | DynamoDB

TOOLS: VS Code | DBeaver | NVM

Duration: 2021 Feb – 2022 August
Company: Cognizant| Bengaluru,
Client: India BMS
Role: Senior Full Stack Developer

Project # : EAST

Decommission Roles and

Responsibilities

- Worked on a critical cloud migration project and have delivered critical phases. Hybrid cloud development. Working on designing solutions for the cloud with on-prem data source. Helped deliver high visibility cloud migration phases to production.

- Have designed and maintained streamlined, reusable and reliable code for use within distributed cloud environments. Helped revised, modularized and updated old code bases to modern development standards, reducing operating costs and improving functionality
- Deployment of services using AWS Cloud Formation Template and Terraform. Integration of Microservices with APIGEE as end user API Gateway

TECH STACK: AWS ECS | AWS Lambdas | API Gateway | APIGEE | NodeJS

TOOLS: VS Code | APIGEE | GIT

Duration: 2019 Feb – 2021 Jan
Company: Accenture| Bengaluru,
Client: India Accenture-Internal
Role: Senior Application Analyst

Project # : Enterprise Application Archival

Roles and Responsibilities

- Worked on an archival project which involves creation of a solution inside AWS to archive structured and unstructured data and provides a low cost storage solution for the same.
- Helped architect the entire project, setup of RDMS database (postgres) and writing the code inside AWS lambdas to serve the needs of the projects.
- Built AWS lambdas using Nodejs as primary language and utilizing AWS services like S3,SNS and SQS. I collaborated with product owners, team members, technologists and other scrum masters to define solutions and drive the progress of requirement gathering, development, testing and release

TECH STACK: AWS ECS | AWS Lambdas | API Gateway | APIGEE | NodeJS | AWS EKS | S3 Bucket | AWS Athena

TOOLS: VS Code | SVN

Duration: 2016 July – 2019 Jan
Company: Grazitti | Chandigarh, India
Client: Internal
Role: Senior Software Developer

Project # : SearchUnify

Roles and Responsibilities

- Worked on creation of RESTful API using ExpressJS,HapiJS framework along with MySQL and MongoDB as primary databases written in NodeJS.
- Worked with software development and testing team members to meet client requirements for functionality,scalability and performance
- Lead a team of 3 people working on both frontend and backend technologies following the Agile model. Process of deployment of AWS services through Jenkins and passing to the QA environment was being followed

TECH STACK: AWS EC2 | NodeJS | AWS RDS | S3 Bucket | MongoDB

TOOLS: VS Code | SVN

Duration: 2016 Jan – 2016 June
Company: Codebrew lab| Chandigarh
Client: Internal
Role: Software Developer

Duration: 2014 Jan – 2015 April
Company: Clicklabs | Chandigarh
Client: Internal
Role: Software Developer

Educational Background

BTech: Electronics and Communication Engineering, University Institute of Engineering and Technology(2010 – 2014)
